

Flow Control Norway expands its stock

Flow Control Norway currently has the largest stock off On / Off valves ≤ 2 " with both NORSOK and Statoil TR 2000 certification. In addition, we also have a significant selection of valves larger than 2 "

Based on the growing demand for valves we have experienced the past years we are now about to expand our stock capacity from time to time level of approx. 3500 valves to approx. 4500 valves to meet our customers' need for rapid delivery of on / off valves on short delivery times.

The reason for the increased customer demand is composed of a general increase in activity in the market and the fact that more and more

People choose Flow Control Norway AS as their preferred valve supplier.

In addition to providing a large range of valves from stock Flow Control Norway AS has established a high level of expertise in the acquisition of valves from a broad range of European valve manufacturers, which enables us to offer the best solutions and the shortest delivery times.

Flow Control Norway AS has also expanded the staff of sales engineers during the past year to handle the growing demand..

The storage expansion has now given us a more completed range of each valve types with regard to:

- Material selection
- Connections/flanges
- Dimension's
- Pressure classes

(All valves on stock are certified according to NORSOK and Statoil TR2000 specifications)
